

Halsey Taylor® WaterSentry® Plus Filter

Provides great tasting water with the assurance that contaminants and lead are removed from your drinking water.

Features & Benefits

- 3,000 gallon capacity equates to over 22,000 water bottles filled*.
- Designed to remove lead particles and chlorine.
- Reduces odors and discoloration from incoming water.
- Quick-Disconnect, ¼ turn makes installation and replacement easy.
- Automatic inlet shut off valve that closes when filter is removed to minimize spills.
- Filter material is self contained so it is never handled limiting the potential of bacteria contamination.
- Tested to the following NSF International standards: ANSI/NSF Standard 42 Chlorine-Class1, Particulate-Class 1ANSI/NSF Standard 53 for Reduction of Lead.

*Capacity may vary depending on local water conditions.
Water bottle based on 16.9 oz. per bottle.

How it works

Radial flow-thru design provides more surface area for untreated water.

Spun polypropylene prefilter mesh to prevent large, coarse sediment and particles from entering and clogging filter media.

High-grade filter is made with activated carbon and patented ATS lead-removal media.

Final filter mesh prevents loose carbon from entering water.

Available in packs of 3,12,24 & 48
